

WELCOME TO PARK COUNTY

Park County Wyoming is a wonderful place to call home. We are blessed with fabulous scenery, millions of acres of public lands including the Nations first National Park as well as the first National Forest, fantastic wildlife, and best of all, **friendly people**.

Living in Park County can have its challenges, however. Our tough environmental conditions include a short growing season, limited rainfall and water resources, unique soil characteristics, and all the other challenges that we are faced with in living in a high plains desert. Planting and maintaining gardens, yards, and sustainable pastures can be quite labor intensive. Keeping weeds under control is a long term commitment.

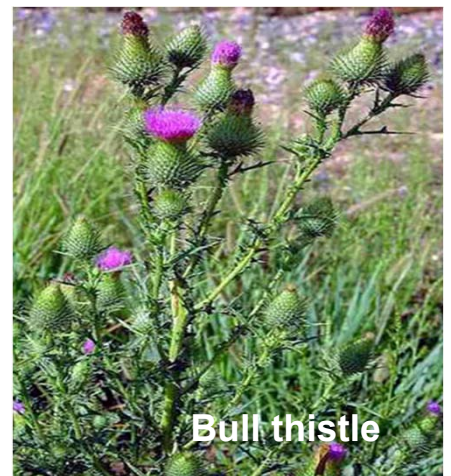

And then there are noxious weed species. What exactly are they? ***Why should you care about them?*** Wyoming has 30 “designated” noxious weeds and Park County has an additional 16 “declared” noxious weed species. Some of these plants are toxic to livestock including horses or may be harmful to human health. Would you like to learn about the plants-desirable or not- that are on your new property? There are many resources available to assist you in becoming acquainted with your new surroundings.

Park County Weed and Pest Control District is just one of these resources. Consider having a Weed and Pest professional provide an **inventory** of your property to determine if there are “**unwanted**” ***noxious weeds*** or pests on you land and what to do if there are. *This service is provided at **no charge**.* Please contact us at the numbers listed below to ***schedule your FREE consultation.***

Congratulations on your new home!

Dalmatian toadflax

Bull thistle
